

Ask us about our product handling equipment which will allow you to print on cartons in the flat

STC 11

The aps STC 11 is the simplest solution for the printing of basic information such as

- product name
- date / time
- julian date
- expiration date
- counter
- repeat print

on porous substrates.

Compact and easy to install, STC 11 will fit perfectly in most secondary packaging production environments. Its intuitive menu requires little skill and training to operate successfully.

STC 11 benefits from all the key benefits brought by the cartridge concept:

- high resolution printing,
- no maintenance,
- simplicity of use.
