

# Titan-D<sub>3</sub> Gold Series Laser

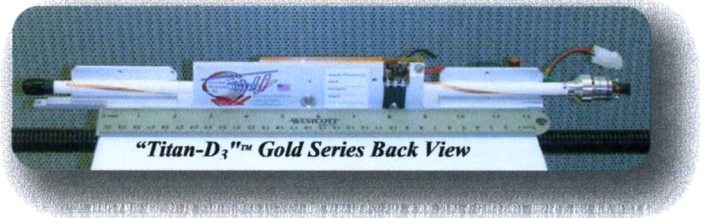

**Highest Quality - Most Powerful Laser Tube Made for the DDC3**

*Direct from the original manufacturer*

## Major Benefits

Visit us at: [www.DPILasers.com](http://www.DPILasers.com)

- Best possible mark quality
- Maximum laser tube life
- Direct Drop-In replacement for any DDC3 unit
- Most consistent laser power output for the DDC3
- Easy to install
- Most powerful "BLACK" 10.6 $\mu$  or "BLUE" 9.3 $\mu$  laser tubes available for the DDC3
- All new laser tube as compared to an "SEL" or remanufactured (used) tube

## Key Features

- Titanium body for best optical alignment and stability
- Improved gas seal integrity for longest tube life
- Elimination of optical mode drift
- Highest quality ceramic optical resonator
- State of the art laser optical system
- Upgraded cooling fin mechanical support for improved robustness and cooling
- Heavy duty cooling fin RF grounding for enhanced RF power coupling
- All new state-of the art RF power supply components and configuration
- DC decoupled RF electrodes for safety and elimination of DC arcing
- Newly designed RF electrodes maximize laser power output
- Single 360 degree rotation of RF "hot" electrode configuration
- "Die-Hard" RF power transistor with integrated electronic protection
- Corrosion resistant brass RF cover with Kapton sealing
- "Drop-Safe" shipping container for maximum individual laser protection during transit
