Deviating mirrors

SE - DM SERIES

To be used with the SE2, SE4, SF2 light curtains and mono-beam Sx-ST2/ST4 safety sensor series.

Available in different heights ranging 150 mm to 1800 mm. Deviating mirror dimension: 124 mm width, 6 mm depth.

Protective stands and deviating mirrors

SG - PS / SG - DM SERIES

Sturdy aluminium column stands for shock protection of the mirrors and safety light curtains. All the SE and SG light curtain series can be mounted inside the support as well as the SG-DM mirror series. The fixing system supplied and spherical spirit level at the stainless steel base guarantee fast installation and precise alignment.

Note: please carefully follow the instructions supplied in the user manual relative to the operating distances for the correct use fo the deviating mirrors.
