

DATALOGIC AUTOMATION FOR FACTORY AUTOMATION

Datalogic Automation is one of the major worldwide producers of automatic identification, detection and marking solutions for industrial automation.

The five Product Groups:

- IDENTIFICATION (BAR CODE & RFID)
- SENSORS
- SAFETY & MEASUREMENT
- VISION
- LASER MARKING & PROCESSING

that today form Datalogic Automation, guarantee product focalization aimed at satisfying specific customer applications as well as offering a very wide and complete product range for Factory Automation, particularly in the following sectors:

- AUTOMOTIVE
- HEALTHCARE - PHARMACEUTICAL
- FOOD - BEVERAGE - TOBACCO
- ELECTRONICS & SOLAR
- GENERAL MANUFACTURING
- TRANSPORTATION & LOGISTICS

Identification Product Group

The Identification Product Group develops and manufactures Auto ID solutions with a complete range of devices with laser and RFID technology able to ensure traceability of industrial processes and to streamline material sorting in logistic applications:

- Bar Code Readers
- RFID

Sensor Product Group

The Sensor Product Group offers a complete range of universal and application sensors, as well as a wide range of inductive, capacitive and magnetic sensors:

- Photoelectric Sensors
- Proximity Switches

Safety & Measurement Product Group

Thanks to the Safety & Measurement Product Group, Datalogic Automation is amongst the main European manufacturers of safety light curtains, developed according to the SAFEasy™ concept, that makes simple and safe even the most complex applications:

- Safety Devices
- Measurement

Vision Product Group

The Vision Product Group includes vision sensors for inspection and 2D readers for identification based on the state-of-the-art technology, that however remain easy to use:

- 2D Imagers
- Vision Sensors

Laser Marking & Processing Product Group

The Laser Marking & Processing Product Group manufactures low power (up to 200W) solid state (DPSSL) industrial laser sources and marking systems:

- Marking
- Processing
