

HSA USA

Micron_{MC-HP1}

Unique small controller and printer in one
ideal for repeat printing jobs

HP TIJ 2.5 technology

The HSAUSA Micron is based upon reliable HP TIJ 2.5 technology which delivers consistent, high-quality, fast printing, exceptional value, and ease of use. The Micron is ideal for printing labels and for all cartons for food and pharmaceuticals. The possibilities are endless.

Load print job from USB-key

Build your print job on a PC using the free MicroDraw software delivered with the printer. Transfer to USB-key and connect to your Micron printer and you are ready to print. The layout can be saved to the internal memory and the USB-key may be removed.

Easy to integrate and use

The Micron is an 'out of the box' unit. Place an ink-cartridge in the head, connect to power and print instantly by pushing a button.

The printer takes up very little space. Not much more than the actual print cartridge itself. This makes it very easy to integrate.

Print horizontally or simply change the position of the printer 90° for printing vertically/down.

Built-in sensor

The Micron printer has an internal sensor. If external sensor is required connect this directly to the printer. The sensor distance is easily selected when designing the print job.

1/2" print height

The HSAUSA Micron runs with 1 HP print cartridge allowing a print height of 12,7 mm.

Ink Cartridges

You are able to select any HP ink cartridge you want when printing with the Micron. Spot colors, UV color or fast drying inks are all available. The voltage for the specific ink can be changed when building the print job.

Prints in 300 x 300 dpi

- GRAPHICS
- TEXT (ALPHA NUMERIC)
- COUNTERS
- BARCODES (FIXED)
- DATE & TIME (REAL-TIME & ADJUSTED)
- 3 WINDOWS TRUE TYPE FONTS
