

Titan-S₂ Gold Series Laser

Highest Quality - Most Powerful Laser Tube Made for the S200

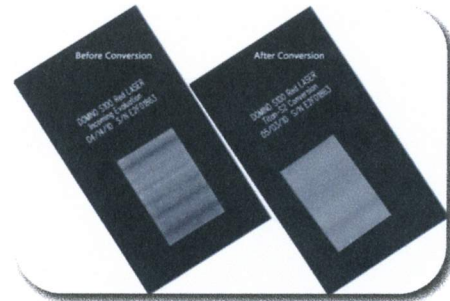

Direct from the original manufacturer

Major Benefits

Visit us at: www.DPILasers.com

- Best possible mark quality
- Maximum laser tube life
- Direct Drop-In replacement for any S100, S200 unit
- Most consistent, laser power output available
- Most powerful "BLACK" 10.6 μ , "RED" 10.3 μ or "BLUE" 9.3 μ laser tubes available for the S-series
- Completely new laser tube and laser assembly
- New 24 month warranty
- Upgrade for the same or less cost than repairing
- Easy, simple replacement on line
- Eliminates Duty Cycle restrictions, Use 100% marking duty cycle for best mark quality
- Eliminates compressed air cost and contaminated air damage

"Titan-S₂"™ Gold Series Improved Mark Quality

Key Features

- Titanium body for best optical alignment and stability
- Improved hermetic gas seal integrity for long life
- Elimination of optical mode drift
- Highest quality ceramic optical resonator
- Exclusive water/compressed air compatible cooling system
- Upgrade to IP 65 rated enclosure
- Upgraded RF power supply components and configuration
- All new state-of-the-art RF power supply components and configuration
- DC decoupled RF electrodes for safety and elimination of DC arcing
- Newly designed RF electrodes maximize laser power output
- Quad-Dipole "hot" RF electrode configuration
- "Die-Hard" RF power transistor with integrated electronic protection
- Corrosion resistant brass RF cover with Kapton sealing

"Titan-S₂"™ Gold Series
