12"W x 12"L

Height

Adjustable, 30-40"

Controls

Photo-sensor activated cycle and dry-contact output signal, Manual Cycle button

Other

Extruded Aluminum Frame that can be reconfigured for custom applications

The VICTORY BatchDrop is designed to accumulate batch-counted products and dispense the batch as a group onto conveyors including flighted and flat-belt typically part of wrapping and poly-bagging systems.

Quick setup features provide the flexibility to process a wide variety of material types, sizes, and thicknesses including sheets, forms, greeting & novelty cards, envelopes, folded documents (including open edge), magazines, brochures, and much more.

Simple, easy-to-use controls allow for greater uptime thus increasing productivity.

Designed with flexibility in mind, the BatchDrop can be used throughout your production department as infeed or outfeed accumulation (when properly equipped).

Quick and easy height adjustment allows for use with various pieces of equipment.

The heavy-duty design will provide years of dependable service with little maintenance required.
